

ANISH RAJ B

anishraj21@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Cybersecurity and Computer Science student with hands-on knowledge in networking, Linux administration, web security, and security analysis tools. Familiar with TCP/IP, Nmap, Wireshark, Splunk, Bash scripting, and OWASP principles. Interested in SOC operations, vulnerability assessment, threat detection, and practical cybersecurity learning through projects and certifications.

EDUCATION

Jyothy Institute of Technology - VTU

Bachelor of Engineering in Computer Science and Engineering — CGPA: 8.5/10

Bengaluru, India

Expected 2027

PROJECTS

Smart Detection of Malicious URLs Using Machine Learning | *Python, Scikit-learn*

- Developed a phishing URL detection system using Python and machine learning concepts.
- Implemented feature extraction using HTTPS usage, URL length, and domain-based analysis.
- Integrated real-time detection concepts using automation workflows.

Nmap Scanning System | *Nmap, Python, Networking*

- Built an automated network scanning system using Nmap.
- Performed host discovery and port scanning operations.
- Improved scanning workflow efficiency through scripting automation.

Secure Password Manager | *Python*

- Developed a Python-based password manager with secure credential storage.
- Implemented authentication and password generation functionality.

TECHNICAL SKILLS

Cybersecurity: Web Security, OWASP, SOC Fundamentals, Threat Analysis

Networking: TCP/IP, OSI Model, HTTP/HTTPS, Network Scanning

Security Tools: Nmap, Wireshark, Splunk

Operating Systems: Linux, Kali Linux, Windows

Programming/Scripting: Python, Bash, PowerShell

Developer Tools: Git, GitHub, Git Bash, VS Code

CERTIFICATIONS

IBM SkillsBuild – Security Operations Center in Practice

Fortinet Certified Fundamentals in Cybersecurity

Linux Unhatched – Cisco Networking Academy

Networking Basics – Cisco Networking Academy

Cybersecurity Analyst Job Simulation – Tata Forage

Cybersecurity Job Simulation – Mastercard Forage
